
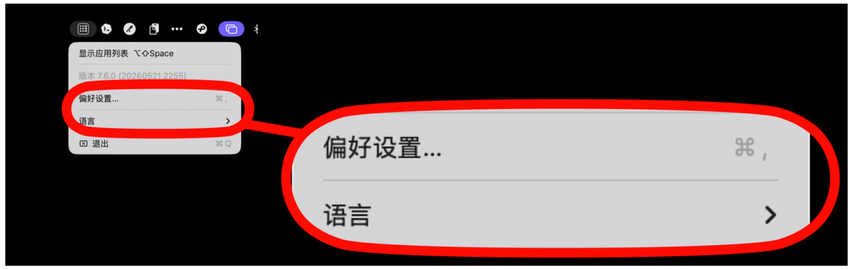
Open Settings

1. Menu bar
2. Top-right icon
3. Command+,



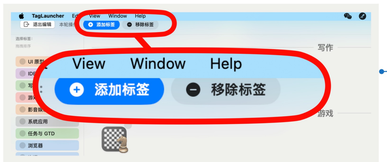
Open Quick Search

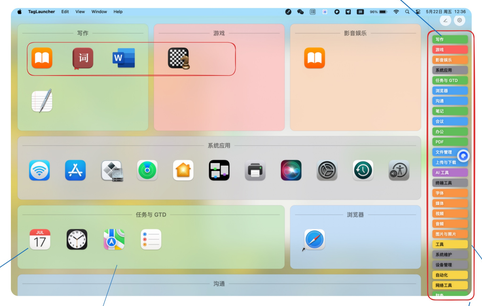
Space -- TagLauncher main screen only

fn+Space -- works globally

Click Edit to enter edit mode

-- Note: two edit modes: add or remove tags





Drag icons to another group

-- Alt-drag copies; drag moves

Drag into the gap between groups to remove this tag

-- The app will no longer belong to that tag category

Drag onto a side tag to add that tag

-- This adds the tag to the app. One app can have multiple tags
